

# Aion Analysis Report

## Aion's purpose

### Aion clarity of purpose

### Aion purpose and aspects

Blockchain 3.0. Aims to create a protocol that connects all other blockchains as well as becoming the platform for the creation of new ones. DApps support system. Mainstream adoption of blockchains has been limited because of scalability, privacy, and interoperability challenges. Aion is the first multi-tier blockchain network designed to address these challenges.

### Aion additional differentiation against competition

The Aion multi-tier blockchain network is like a computer network, providing a protocol and standard for dissimilar systems to communicate. However, in addition to information, the Aion network will pass logic and value among participating blockchains to create a contiguous value chain where every transaction occurs on-chain, with logic and value passing among chains as freely as liquid assets. The team behind Aion has been particularly close to several large-scale enterprise projects, where the challenges outlined previously are significantly pronounced. The Aion network is designed to overcome these challenges, and to propose a solution that will enable blockchain applications to achieve their full intended potential. In our research and development of Aion to date, we were fortunate to come across incredible findings and experiments from leading thinkers and researchers working on complementary concepts.

## Aion's Facts & Figures

<b>Name</b>	Aion
<b>Trades under Symbol</b> ⓘ	AION
<b>Circulating supply</b>	224,794,886
<b>Maximum supply</b>	465,934,586
<b>First USD price per coin</b>	\$0.62
<b>Coins Distributed in ICO</b>	N/A
<b>Emission rate</b> ⓘ	No new tokens created
<b>Blockchain</b>	Ethereum
<b>Consensus method</b> ⓘ	Ethereum consensus (currently proof of work, will be proof of stake later on)
<b>Algorithm</b>	N/A
<b>Time for block processing</b> ⓘ	0.1
<b>Transactions per second</b>	0
<b>Is coin Movable?</b>	No
<b>Type</b>	Token

## Aion's Algo score

The CoinCheckup Algo score is a score based on extensive research we do on every crypto coin or token.

We apply a [fully transparent formula](#) on every coin/token in order to stay unbiased and look at the facts.

Not all coins/tokens are the same, so the formula is different for a centralized, semi-decentralized, or decentralized coin. That being said, the formula is always the same for each type of coin and our ratings are always transparent.

## Aion's Performance Statistics

### ➔ How long has Aion been trading?

Aion has been trading for **11 months** (1 years) now. According to our records, it started trading on Thursday, October 19th 2017, for a first price of \$0.6160.

### ➔ How volatile has Aion been over the last 30 days?

Aion's **30 day volatility** has been 39.05%.

① *The higher the volatility, the higher the risk and/or potential gains can be for a certain coin, since the movement is stronger for the time period in question.*

### ➔ How volatile has Aion been over the past week?

Aion's **7 day volatility** has been 18.86%.

## Aion's Predictions

### M0 money in the crypto market

M0: The total of all physical currency, plus accounts at the central bank which can be exchanged for physical currency

### M1 money in the crypto market

M1: Measure M0 plus the amount in demand accounts, including "checking" or "current" accounts

## Aion explained In-depth!

### What Is Aion?

#### Short description

Aion network aims to provide a multi-tier blockchain system to improve the scalability, privacy, and interoperability of the blockchain. The Aion Network is designed to support custom blockchain architectures while providing a mechanism for cross-chain interoperability. The AION token is the fuel used to create new blockchains and to monetize inter-chain bridges.

#### Abstract

Mainstream adoption of blockchain systems has been limited due to unsolved questions of scalability, privacy, and interoperability. Core to our hypothesis is the idea that many blockchains will be created to solve unique business challenges, within unique industries. As such, the Aion Network is designed to support custom blockchain architectures, while providing a trustless mechanism for cross-chain interoperability. At the root of this system is the world's first dedicated public enterprise blockchain, Aion-1; a state of the art blockchain that introduces a new paradigm of security, and fair, representative crypto-economic incentives.
